## Local News

Mr. Hadden is building a new house.

Miss Ruth MacLaren who took normal training at Camrose the past term, has just received word from the Dept. that she was successful in all subjects, thereby receiving a first class certificate, and will teach the following term in the East Buffalo Lake district.

Mr. Byers and wife moved in to the Allan house.

J. F. Flewelling and son Henry left Friday for Saskatoon to visit. Mr. Flewelling's mother, brother and nephews.

Mrs. A. Moller and daughter are visiting at Edwarg.

A large number from town attended the Grand Orange lodge session at Edmonton.

H. Watters of Big Valley moved into the Geo. Burt house.

Mrs. Hector McPadden and Mrs. McDonald of Big Valley are occupying the Joe Carrier residence.

R. J. Bigelow of Big Valley moved into the Tom Walton place.

Mr. C. Forbes and family of Hanna arrived in town Sunday on their holidays.

Mr. and Mrs. Adam Thompson and son Franklin, accompanied by Mr. Len Roberts visited over the week end at the home of Mr. and Mrs. H. A. McKenzie.

A large number took advantage of the beach on Sunday.

Don't forget the tea in the library bldg on Saturday, July 28th. Mrs. Fraser, Mrs. Watters and Miss Jamieson will be the hostesses.

Drums of Love, by D. W. Griffith will be shown at the Grand, Friday and Saturday.

The beach is being rapidly improved, the road is now completed, and is being well traveled by beach visitors.

Mrs. Fred Moritz sister of Mrs. Junget, arrived Friday from Chicago.

There will be a Board of Trade luncheon on Friday at 12:15.

Mrs. L. Olson and son Leo were visitors to the Edmonton Exhibition.

Miss Waters, sister of Mrs. Cassidy accompanied by Mr. McLaughlin and Mr. and Mrs. Cadman of Moose Jaw are visiting with Mr. and Mrs. Cassidy.

The chautauqua committee will meet tonight.

## NOXIOUS WEEDS

Your co-operation with the Provincial and Municipal authorities is solicited in the control and eradication of weeds. Keep your fields and roadside free from these unsightly and costly pests.

Weeds reduce the yield and lower the grade of your grain and rob the soil of its fertility and cost money in docking and transportation. Approximately 6,000 cars were required to haul the screenings from one season's crop in Western Canada to terminal markets. Will you not help to reduce this enormous loss?

Give your local weed inspector or the Provincial Field Supervisor in your District every possible support in dealing with the weed problem.

Field Crops Branch  
Alberta Dept. of Agriculture.

## Some Prize Winning Recipes

1st prize recipes. Correcting constipation.

**Breakfast Porridge**  
1 cups Suikes (whole wheat)  
1 cup Tilsons bran  
1 tsp salt 4 cups water  
Put suikes and bran into rapidly boiling salted water. Cook overnight in double boiler. Serve with honey and rich milk. Every third morning substitute rolled oats for whole wheat and serve with golden syrup or brown sugar and milk.

**Whole Wheat Porridge**  
To boiling water add enough whole wheat flour to make thick add salt and cook from 1 to 1 1/2 of an hour. Serve with cream and sugar.

## Graham Muffins

3 cups graham flour  
1 t.p. baking powder  
1 cup white flour  
2 t.sps. sugar 1 tsp. salt  
To 1 pint milk add 4 t.sps. butter, put on stove till butter melts. Let cool. Add to well beaten eggs and mix in dry ingredients. Bake in muffin tins and serve with maple syrup.

## FOR SALE

14 inch Gang Plow  
16" Fordson Breaking Plow  
Bay Pony, wt. 800 lbs.  
2 Beds and Springs  
China Cabinet  
Morris Chair  
Centre Table  
Carpet Sweeper  
Power Washing Machine and Wringer  
Will also sell cheap, a seven room house, plastered and in good condition.

GEORGE THOMAS

Last week's stock market:  
Thick enough hogs.....11  
Top steers.....69  
" cows.....67  
" heifers.....68  
" calves.....10

Mr. and Mrs. Schultz and family visited Edmonton, Friday.

## NOTICE

To whom it may concern  
After August 1st credit for milk and cream will be limited to \$5.00

H. A. McKenzie.

I wish to appeal to all the farmers in the Municipality of Lamerton to mow the weeds and grass along the roadside. It will vastly improve the appearance of the country and will help to eradicate the noxious and other weeds.

C. M. Yurwood.

Weed Inspector

## Tenders for Painting

Tenders will be received for the painting of Hickling school and outbuildings and barn. The above buildings to receive two coats of paint. The school board will furnish paint; work to be done as soon as possible. The school house to be wire brushed. School house 29.34 with porch in front. Barn is 20x28. For further particulars write to

H. J. Goster, Sec.-Treas.  
Mirror.

# Many Investigations Carried On By National Research Council Connected With Crop Problems

Handicap to research work in agricultural problems, resulting from lack of funds for the purpose are likely to be overcome, recently a decision to hand over to the National Research Council \$210,000 of accumulated "overages," from the government (tenants) elevators.

It is to be specially co-ordinated for plant pathology, grain diseases, and the like. Surpluses accruing from the elevator trade will thus go indirectly to assist the problems of grain growing.

The research council and the department of agriculture, in co-operation with the universities, have been engaged in combining mainly grain rust and root rot. Recently a specialized committee on field crop diseases has been appointed by the council jointly with the federal department of agriculture for the purpose of undertaking research work into field crop diseases.

The importance of such a research will be appreciated when it is stated that the estimated cost annually to the North American continent through crop diseases is about 10 per cent, to 20 per cent, of the total crop values.

At the present time, agricultural research work is going on at the University of Alberta summer building laboratory where representatives of the research council, the federal department of agriculture and the University are working together. The same arrangement is in effect in the University of Saskatchewan, in the University of Manitoba the laboratories were provided by the federal department of agriculture, and are being run in co-operation with the University of Manitoba.

At the present time Professor Robert Newton is conducting an investigation of the factors governing the milling and baking quality of wheat with the purpose of ascertaining why the quality of wheat varies so widely from place to place, and the possibilities for improvement by the use of better adapted varieties and better cultural practices. Professor Newton is also endeavoring to obtain a better knowledge of the possibilities and limitations of fertilizers for growing wheat on a quality basis.

A further investigation has been conducted by Professor E. H. Strickland into the life story and control of certain pest insects which cause wheat wire-worms with the purpose of reducing the present annual losses to farmers which now amounts to many thousands of dollars annually.

Professor F. H. Roberts is conducting an investigation for the purpose of determining the exact factors concerned in the inheritance of sugar and starch in the endosperm in Indian corn, while a further investigation is being conducted by Professor A. H. E. Bailey with reference to the size of spores in fungi, and Professor A. T. Cameron is engaged in research into the diseases of plants indigenous to Western Canada, and adjacent territory.

Technical research with respect to the effect of light upon vegetation are being conducted by Professor A. G. Hugg, who hopes to secure data which will have important application in respect to the fisheries, the forests and human life, while other researches are being carried out by E. A. Lloyd in connection with poultry.

A further research is being conducted by Professor Robert Newton for the purpose of discovering the fundamental nature of frost resistance in crop plants and the different reliable methods by which the plant breeder may estimate accurately the hardiness of a new strain the first season rather than be forced to test it in field plots for several winters. Researches are also being conducted by Professor A. E. Cameron into

the economic significance of the horse-die to stock breeders; by Professor F. J. Lewis into the reserve food material in green leaves during winter seasons; by Professor J. H. Pryor, into the biological origin of false wild oats; by Professor W. P. Thompson into the inheritance of earliness and lateness of wheat and the milking of early hybrids direct breeding; by E. S. Hopkins the subject of determining the water requirements of crops; by Professor W. Sadler, on the subject of the correlation of the grading of cream and butter with the bacterial content of the milk or cream used in the preparation of these products; by Dr. J. P. Stull, on the subject of acidity and time requirements of Quebec soils; by Dr. F. C. Harrison, on a variety of subjects regarding soil contents; and by Professor G. W. Seaton, on the effects on plant growth of the various electric elements or ions and the more fundamental causes of these effects.

By no means the least important of the co-ordinative and co-operative researches which have been going on for some time past and from which results are being secured is that in connection with tuberculosis, a full report of which will be forthcoming next autumn.

**One-Piece Slip-On Dress**  
One-piece slip-on dress, having V-shaped neck finished with applique bands and a bow of material or ribbon. Circular insets at sides of dress. Darted sleeves, perforated for ventilation. For ladies and misses. Size 36 years: 36, 38, 40, 42 inches bust.  
Size 36 requires 2 1/2 yards 40-inch material with long sleeves.  
Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every house dress maker. Price of the book 10 cents the copy.

**How To Order Patterns**

Pattern No. .... Size ....  
Name .....  
Town .....

**New Marketing Organization**  
Encouraged by the success of co-operative marketing shown by the Canadian Wheat Pool, the smaller farmers in Eastern Canada are forming a co-operative marketing association. The plan for such an association was submitted at a recent meeting of the Dominion Millers' Association and was endorsed unanimously. This is a new departure in co-operative marketing, which is already applied to a variety of farm products.

There are 1,063,578 letters in the complete Bible.

The first cannon was used in England in 1327.

The steamship Iseltine which left North Sydney N.S., on July 18 with a detachment of the Royal Canadian Mounted Police, headed for Greenland, Rappahannock and then to Buche Peninsula, most northerly police post in America. The expedition is commanded by G. P. Mackenzie, whose picture is inset above.

## Ruling Likely To Stand Vitamins For Growing Chicks

Cancellation Of Duty On Publications Cod Liver Oil Is Recommended In

Leg weakness has been a common disease of young chicks but investigations of recent years have taught poultrymen how to avoid this trouble. If growing chicks get an abundance of direct sunlight they are not liable to contract this disease, but if housed for four or more weeks they are invariably subject to the trouble which may be prevented by special feeds, that are known to be rich in vitamins. Cod liver oil is now used in many poultry flocks and its virtues is believed to be due to its richness in vitamins. A pamphlet on the artificial "Brooding Of Chicks," prepared by the Dominion Poultry Promoter and published by the Dominion Poultry Superintendent for New Brunswick, recommends the use of cod liver oil in amounts of one to two per cent of the mash according to the degree of confinement. This, it is claimed, will prevent or even cure rickets in young chicks. For instance, in the case of egg yolks and canola tomatoes are claimed by these authors to have a value in preventing leg weakness. Other feeds rich in this necessary element are found in yellow corn, green feeds, immature cut clover and alfalfa hay. These if used in an otherwise well balanced ration will give the flock the vitamins necessary for their well doing.

The Customs Board has adequate authority under the statute to place the on the dutiable list and the only body which can override the board now is Parliament itself, as the Privy Council already has sustained the ruling of the Board. The Privy Council in this case is the Federal Government.

## Hog Pastures

What Pasture Compared With Rape Pasture In Experiment

Wheat pasture compared with rape pasture for hogs in an experiment conducted at the Southern Saskatchewan Experimental Station, showed wheat pasture gave the better results. With two lots of hogs otherwise fed alike, those on wheat pasture made a higher daily average gain of 37 pounds at a cost 8 cents less per pound than the lot on the rape pasture. The rape and wheat pasture made very little difference in the type of the hogs, although according to the report of the station for 1927, published by the Department of Agriculture, Ottawa, the hogs fed on the wheat pasture showed a better finish.

## Pemmican For the Eskimos

Wainwright Buffalo Pemmican Shipped To North For Food

A recent shipment of buffalo pemmican from Wainwright brought the season's quota up to 1,088 head, which will probably be the final shipment to the Mackenzie River District.

At the present time pemmican prepared from buffalo meat put into the pack about 100 head of Alberta packing house last winter is being shipped to an eastern port for transportation to the native in the Arctic. The pemmican shipments have been forwarded by water to the Eskimo in the vicinity of Akavik, where it is understood to have met with considerable favor.

## SO LONG CHAPS

Stung to protest by the slur that they are "department store cowboys," the guides of the Rocky Mountains are reported to be discarding their picturesque "chaps" in favor of common or garden riding breeches.

The guides of the neighborhood of the Banff Springs Hotel are the delight of visitors, with their brown helmets, hats and shaggy sheep skin chaps, worn primarily in the early days to protect the rider from leg injury when herding long-horned steers on the prairie. But facts that the unknown riding breeches are as serviceable and can give no cause for criticism as seeking an effect, it appears that a change in fashion, and soon the brown-horned costume as the guides conceived it may be only a museum piece.

The Rocky Mountain Guides in experimenting with trail riding for the first time, have an amusing and exciting time and succeed in not only making the trip more interesting to the needs of their party, but in safeguarding the most timid tourist, and bringing about through happy and unharmed.

# Prominent Canadian Educationist Speaks On High Standards Of Life That Obtain In Dominion

In Charge of Transportation

Dr. E. A. Hardy, of Toronto, president of the Canadian Teachers' Federation, brought greetings from Canada to the National Education Association, of the United States, in annual convention at Minneapolis, under Miss Cornelia Pease, of Richmond, Va., national president. Dr. Hardy stressed the achievements of Canada and the important part played by the teaching profession, in the dominion maintained a uniformly high standard under the rigid supervision of the provincial education departments.

"Speaking as a Canadian, it seemed to me that I should try to express to you, though in the briefest way, the outstanding features of Canada and the Canadian life and the relations of the Canadian teachers to that national life," Dr. Hardy said.

"There are certain characteristics of Canada which I would note. First, the high standards of life, material and spiritual. Thanks to our natural resources, agricultural and industrial, rich beyond the dreams of the wildest imagination, and to the marvelous occupation of these resources, our people live in a general comfort and prosperity, unequalled anywhere except in the United States. On the material side, we have achieved achievement in literature, painting, architecture, music, and science, and power of religion in our life is deep and vital. Our people are the best of life, both material and spiritual. Canada is second to no other country in the world."

## Canada Assists In Building Up Forests

Seed Collecting In B.C. Has Brought Valuable Industry

One of the largest seed extraction plants in North America is maintained at New Westminster, British Columbia, by the Forest Service of the Canadian Government. Department of the Interior. Here, in good seed years, thousands of seeds of some 500 species of western yellow pine, Douglas fir, western red cedar, western hemlock, and other trees, are brought in by steamer, rail, motor truck and wagon. These are dried and the seed thrashed, cleaned, bagged and boxed or sealed in containers for shipment to various parts of the world.

The motive prompting the establishment of this plant in 1921 was the desire of the Canadian Government to assist the Imperial Forestry Commission to reforest certain areas in the British Isles denuded during the war years. Experience has shown that many Canadian trees, particularly the Douglas fir and Sitka spruce of the British Columbia coast, do well in Great Britain.

The work of seed collecting, from a small beginning in 1917, has grown to large proportions and today is assisting in building up forests in several countries. New Zealand, particularly, is a grateful recipient of the material, supplied each year with large quantities of Canadian tree seed and smaller quantities are shipped to other countries.

## Seeking To Preserve Big Grizzly Tracks

Removal Of Alberta Prairie Grasses Crop Object Of Experiment

To preserve three million acres of Alberta land for ranchers who find their cattle dwindling on the sparse prairie grass, the dominion field husbandman, E. S. Hopkins, has instituted important experimental work at Manyberries, in the heart of the affected district. Not hopeful of making two blades of grass grow where one grew before, the agricultural experts of the dominion will be satisfied if they can bring back one that has gone. In the past years the grass gradually has been disappearing from the plains at the foothills of the Rockies.

Laid that formerly would support great droves of cattle now barely sustains a few, and the ranchers have had to give up in some cases, or curtail their operations in other ways. The first problem will be to make the native grass grow again, and will grow when seeded.

A deferred and radical system of grazing will be started.

## Many Building Contracts

Building contracts awarded in Canada, in June of this year, totaled in value \$22,028,100, the second highest total ever recorded for any month of the record being in May of this year. Last month's total exceeded that for June, 1927, by 147 per cent. From January 1 to June 30, 1928, the value of building contracts awarded in Dominion amounted to \$26,257,800, which is 53.9 per cent higher than the value for the first six months of last year.

There were eight Cranes conducted into the Holy Land.

Representing 20,000 Canadian teachers, Dr. E. A. Hardy, of Toronto, president of the Canadian Teachers' Federation, brought greetings from Canada to the National Education Association, of the United States, in annual convention at Minneapolis, under Miss Cornelia Pease, of Richmond, Va., national president. Dr. Hardy stressed the achievements of Canada and the important part played by the teaching profession, in the dominion maintained a uniformly high standard under the rigid supervision of the provincial education departments.

"Speaking as a Canadian, it seemed to me that I should try to express to you, though in the briefest way, the outstanding features of Canada and the Canadian life and the relations of the Canadian teachers to that national life," Dr. Hardy said.

"There are certain characteristics of Canada which I would note. First, the high standards of life, material and spiritual. Thanks to our natural resources, agricultural and industrial, rich beyond the dreams of the wildest imagination, and to the marvelous occupation of these resources, our people live in a general comfort and prosperity, unequalled anywhere except in the United States. On the material side, we have achieved achievement in literature, painting, architecture, music, and science, and power of religion in our life is deep and vital. Our people are the best of life, both material and spiritual. Canada is second to no other country in the world."

"Second, Canada is a land of democracy. In Canada not only every administration, federal and provincial, is elected by the people, but every four or five years, but they may go at any time, if public opinion demands it. We have opportunity, through our federal, provincial and municipal bodies, for many thousands of our men and women to represent their fellow citizens. Practically no other country elects a large percentage of its citizens to public office. As to public ownership, Canada leads the world."

"A third characteristic is co-operation. Our area is as vast, our resources as unexplored, our population as yet, and so scattered that we have been learning that in co-operation lies our hope of success. The English and the French races are united in the Government and the development of Canada with marked success. The Religious Education Council of Canada is a nation-wide union of the great Protestant denominations, and the U.C.A., for systematic undertaking of the great task of the religious culture of our young people. So far as I know this is the only nation-wide movement of the kind in the world."

Dr. Hardy explained the dominion's position in the British Empire of opportunity it was proud to be a member and continued: "Internationally we are taking our place. One of our greatest Canadians was a founder of the League of Nations and gave it its constitution. Canada has been a member of the League of Nations from the first. A Canadian has been President of the Assembly of the League, and Canada is now admitted to the inner circle group, the council of the League. In Imperial and International affairs Canada is assuming her place and her people are developing an imperious and a very outlook."

## Relays Color and Movement

J. L. Baird has demonstrated two of the latest developments in his television process—the transmission of movement in ordinary daylight and colored views. By his development of relays, the broadcasting of actual views of open air events is possible as well as the transmission of scenes containing color.

If matches are made in heaven the shipping clerk must make some awful blunders.

"Can you play the violin Peter?" "I don't know. I have never tried!" —Villagers, Oslo.

"I had been speaking to Jason for five minutes when he called me an idiot."

"Did I take him that long to come to a decision?" —Villagers, Oslo.

## Seems To Be A Failure

### Latest Disaster In Arctic Proves Dirigible Airship Is Impracticable

It is an reflection upon the Italian General Nobile's courage or intelligence to ask what was hoped to be gained by his flight to the North Pole. Nations have been put to anxiety and infinite trouble by the desire to settle the Arctic, and the Arctic to settle have swallowed several valuable lives, men have suffered incredible hardships, and Amundsen is said to have died. To what end? If the Italia had reached and returned from its goal, who or what would have been the guinea? What, really, would have been the contribution to science? How would the world have been helped?

It was reasonable, in past days, that men should have wanted to reach the Pole. There were many questions to be answered. But since then have been the same questions. The old controversy about land or water at the earth's top, what is justification for further risk of lives and terrible suffering merely to go back there?

One thing alone Nobile seems to have settled. It is the impracticability of the dirigible airship. Nobile, according to the journalists who accompanied him, took every precaution against just such a disaster as overtook the Italia. On the flight of the Norge, Nobile had seen a double peril in ice. It might be a disaster on the side of the bag, break off and be thrown against the side of the bag or on the propeller. Or it might form on the side of the bag in such weight as to force the airship down. But, regardless of all the precautions that Nobile took, students of flying are in the disaster to the Italia the working out of the law of impracticability of the dirigible airship. Where is the danger? It is in the company of all the great dirigibles that have been tried out both in Germany and the United States, and of eighty-five giant ships of this type built and tried by Germany, not more than ten remain.

The chances of a good balloon, favored by good weather, and skillfully piloted, flying the Atlantic across, would have been shown to be fair. But one has yet seen a passenger over the Atlantic westward the Bremen notwithstanding. The moral seems clear. It is that long strides have yet to be taken before man passage over the oceans can be made by any lighter than air ship but that the chances of success by the plane are infinitely greater than by the once much vaunted dirigible.—From the Ottawa Journal.

### The Art Of Silence

The art of silence is one in which the majority of people are not proficient. Indeed, it is a rare achievement. We find the man of excessive volubility everywhere; on the steamer, in the smoking compartment of railway trains, in the business office, in the sound and fury of the hustings, and our parliament recently found it necessary to put a limit on the length of the longest speech, in the interest of time, patience, expense and efficiency.

### Farmers Prosperous

United States agriculturists who are raising a hubbub about farm relief might do worse than despatch an emissary to study conditions at Chet, Sask. The farmers of that district, according to the United Press, have since the first of the year purchased 13 tractors, eight cars, automobiles and "a carload of trucks."

Each month the moon is said to be in perigee when nearest to the earth and in apogee when farthest from the earth.

Money is important to the farmer's wife because she can't get it; to the city woman because she can't keep it.

The average depth of the Arctic ocean is only 16 fathoms.

"It sprinkles petrol on my handkerchief and they think I own a car!"—Evan Hunter, Madrid.

## Summer Care of the Chickens

### Valuable Advice Is Given In Proper Care and Feeding

Cooked breast bones in chickens is believed to be due more to improper nutrition than to early roasting. This view is expressed in a bulletin written by G. H. Wilson, the Dominion District Poultry Promoter in New Brunswick, and by F. Leslie Wood, the Poultry Superintendent for the province, and issued by the Dominion Department of Agriculture. These authorities recommend the providing of low broad roasts for the chickens when they are transferred from the brooder house to the colony house. This, they claim, will encourage early roosting and in this way offset a tendency for the birds to crowd together during the night. It is well also at this season to separate the sexes when the chicks reach broiler age. The pullets need careful watching and may be given both grain and mash; broiler feed with cracked corn of larger size than they grow older. Twelve weeks' old pullets, the authors claim, should not be expected to eat baby chick size feed.

More expensive and the chick at that age will relish the hen size scratch feed better. The careful attention with care to it that both the brooder and drinking vessels are kept clean and well filled. If the ground becomes bare for any considerable distance from the colony house, it is well to remove it to green soil which is regarded as a preventive of the spread of intestinal diseases. It is important to keep the poultry growing steadily it is not well to force growth too rapidly by using a high percentage of animal feeds, as this has a tendency to start them into laying so young as to stunt their growth, preventing them from ever reaching the standard weight for the breed, and more than this the eggs are liable to be small and the quality poor.

It is in company of all the great dirigibles that have been tried out both in Germany and the United States, and of eighty-five giant ships of this type built and tried by Germany, not more than ten remain.

### Cherries In Manitoba

#### Very Encouraging Results Have Been Obtained At Morden

Cherries are being produced in the province of Manitoba. At the Morden Experimental Station cherries from seedlings more than three-quarters of an inch in diameter were marketed in 1926. Last year the fruit was smaller, but on many of the seedling trees more plentiful. The report of the station, in the bulletin, in its report for 1927, published by the Department of Agriculture at Ottawa, says that some of the seedlings are now fruiting very well while the fruit of others serve very well for canning and making pies. Cherry trees are being used at the station as filters between the standard apple trees. Early Richmond, Dreyhouse, Montmorency and some other varieties are being used in this way. Trees of these varieties come through the winter without injury, but only small crops have yet been produced on these young trees.

### There's A Difference

The difference between a monarchy and democracy seems to be this: When King George goes on a holiday the newspapers print a brief item about his Majesty's departure for the grouse shooting. But when Mr. Coolidge takes a holiday the world is told the size of his shirt, the length of his fishing rod, the number of slices of toast he eats at breakfast, what hymns he sang aloud in church, and a thousand and one details of equally vital importance.

### A Quick Thinker

Jim's employer had excused him from his duties for the afternoon, so that he might attend the funeral of a relative, but when Jim returned to his household, and was about to buy a ticket, whom should he see but his kind employer, also about to purchase a ticket.

"Sir," the lad said anxiously to the ticket seller, "will you kindly direct me to the cemetery?"

### It Seemed Reasonable

Two men up from the country paused in astonishment as the words "Chirpoid" on a brass plate caught their attention.

Said the first: "What in the world is that, Bill?" His friend declared it wouldn't do to let the other think him ignorant. "Heaven!" he exclaimed. "Don't you know? Why, a chirpoid is a man who teaches young canaries to chirrup."

Chivalry was at its height from 1100 to 1400.

A centaur is a fabled monster, part man and part horse.

## Better Equipped Farms

### Modern Machinery Is Doing Away With Much Manual Labor

Despite all the gloomy reports of rural depopulation, production of agricultural commodities continues to increase. Can it be that after all, the mechanization of the farm is more than offsetting the loss of manual labor in the fields.

Clive the average large farmer, a selection of milking machines, tractors, cultivators, gasoline engines and other agricultural automobiles and he can cultivate a much larger area with fewer hired hands. He requires merely a higher type of employee, a man who is as much as a machine, as a title of the soil. If his farm unit is large enough he becomes as much an industrial executive and scientific manager as the farmer.

The nearer farm life gets to mechanical perfection the further it gets away from its original peasantry. The consolidation movement in industry is likely to be followed in agriculture. Large farms, better equipped farms, managed by better trained men, is the way of the future.

The farmer has always been a capitalist by nature. He will be more and more of a capitalist as time goes on. This will bring him gradually into the realm of higher finance. It is no idle speculation that farming will eventually interest the investment banker and investor to a degree that it cannot now interest these elements in finance. We may even see farm stocks listed on the boards of the larger stock exchanges.

The interest of business and finance in farming in the past has been chiefly an interest based upon production—the total purchasing power of the farm population, which is to such a degree a factor in the total prosperity of the country. The interest of business and finance in farming will acquire another interest, that of profit, observing the balance sheets of farms and farmers.

The drift of men and women from the farm may be viewed with concern, so long as it is accompanied by a drift of capital and machinery to the farms.—From the Financial Post.

### Receives New Appointment

The appointment of Dr. R. C. Wallace, of the University of Manitoba, to the position of president of the University of Alberta, in succession to Dr. H. M. Tory, has been announced by the Minister of Education, Percy Baker, in the absence of Premier Brownlee. Dr. Wallace expects to be able to actively take up his duties by the first of September.

### Positive Farmers' Progress

According to a recent census of the farms of the Prairie Provinces, 409 per cent of the population had automobiles; 34.8 per cent had telephones; 23.3 per cent had gasoline engines; 21 per cent had tractors; 2.2 per cent had auto trucks; and 2.1 had electric light.

### Playground of Ontario

The marvelous beauties of the country north of Lake Superior are being used by the tropics near the playground were attended recently in a letter received by A. O. Seymour, general tourist agent of the Canadian Pacific Railway, from Dwight E. Woodridge, a motorist. "I have never been in any region that is as delightful, that has so many varied attractions, as north of Lake Superior," he writes. "There are no noxious animals nor reptiles, and almost all

## Grain Crops For Hay

### Banner Crops Reported As Giving Best Results

The crops for grain in the prairie provinces for forage is yet an unsettled question. At the Indian Head Experimental Farm grain from spring silage and in combination did not appear to increase the yield or quality of the hay crop in comparison with others. Barley, sowing the hooded head variety, occupied an intermediate position when sown alone or in combination with oats. The addition of peas added little appearance and increased the yield of high green vegetation, but the position of such mixtures was low when compared on a basis of cured hay. The possibilities of Marquis wheat for this purpose were tried, but its use is not recommended. Among the grain varieties that are out in reported by the superintendent of the station as having given the best results as an annual hay.

### Not Great Expense

#### Uphold Of Canada House In London Comparatively Small

The following figures concerning the respective costs of Canada House and Australia House in London have been supplied to The Canadian Press: Australia house, for 1927, \$3,400, 600 number of staff, 331; Canada house, for 1927, \$235,000 number of staff 148.

The costs mentioned in regard to Canada house comprise high commission, office, department of immigration, department of trade and commerce, soldier's re-establishment and pensions, department of health and welfare of Canada house. The figures do not include cost of nine immigration agents' offices, four trade commissioners' offices and expense in connection with the new system of examination of intending immigrants to Canada.

### Miss Amelia Viers Return

Miss Amelia Earhart, first woman to fly across the Atlantic, stopped back on American soil after a tour of Europe by boat. With her were Wilmer Stutz and Louis Gordon, pilot and mechanic, on her Atlantic trip. Awaiting Miss Earhart presented each of three aviators with a scroll of welcome. During an interview Miss Earhart said she had no plans for the immediate future.

### Positive Farmers' Progress

"I have never been in any region that is as delightful, that has so many varied attractions, as north of Lake Superior," he writes. "There are no noxious animals nor reptiles, and almost all

ways there is fish or game; there is no heat of the tropics nor the barren mountains of the Arctic; there is always an invigorating climate and plenty of water. One does not have to tie himself to a canteen, as in Arizona, nor need he lug firewood every time he wants to boil water. There is no need to be a miser, for scenery there is nothing more varied or rarer to be found anywhere, with rivers or quiet ranches, and enough portaging interpreters to give plenty of exercise for all muscles."

## A Mineral Curiosity

### Asbestos Is Heavy As Rock Until Mechanically Treated

Asbestos is the only mineral that can be woven into fireproof garments and moulded into instruments impervious to heat. With asbestos armor and tools men can fight even a flaming fire. The messenger dogs of forest rangers in California are clad in asbestos coats to defy timber fires. The material, fibrous and crystalline, elastic and brittle, wears as rock in its crude state yet as light as thistle-down when treated mechanically, has without the heat and enormous pressure of volcanic fire and earth adjustment, apparently without alteration.

Changes in temperature cannot make it expand or contract. Since the earth was in its infancy these veins of silky fibres have survived when the hardest rock has worn or melted away.

Some of those who survive Nebuchadnezzar's fiery furnace were clad in asbestos, while ancient writers tell of a "stone carried" to form handkerchiefs, the fabrics "cleansed by casting them into fire."

Asbestos, in rock form, has been found in asbestos composition floors are but a few of the modern conveniences made from this mineral curiosity.

### Would Be Helpful

#### Farm Research Work Should Prove Valuable To Agriculturists

There is considerable comment on the suggestion that Canada should form a scheme for the establishment of farm research bureaus throughout the British Empire. Canada's main wealth today and for many years to come must come from the wheat fields and the farms. The application of scientific methods in wheat raising has already resulted in greatly increased production. As science makes still further progress, there will be all the greater need to use the resources of the experts in eliminating the yield of the soil.

Research work carried on in the various Dominions and Colonies has been rather strange question 1 put to Mr. James F. Gillies, writes a Daily Herald Mitchell correspondent. "Without any hesitation," he replied, "on a Friday." "And on what day will December 15 fall—Anno Domini?" "Again the answer came: "On a Tuesday."

### Such Is the Power of Mr. Gillies

Who does that through sheer memorizing and nothing else, he can give the day of any date between A.D. 1 and A.D. 4000—a minute and a half day.

Astrologers, students of the calendar, and students who devote to the relation between the celestial bodies and the world's time, can easily check the accuracy of Mr. Gillies' memory. Mr. Gillies, who was born in Highbury, North London, 30 years ago, and is a clerk employed by a Michigan firm, says that he adopted his curious hobby of memorizing dates when he was about 20.

### New Device For Camera

#### Pictures Of Flower's Growth Taken Through a Microscope

A device for automatically filming the growth of plants has been perfected by Carl D. Clarke, medical illustrator of the Johns Hopkins Hospital, Baltimore.

Mr. Clarke has taken pictures through a microscope of a flower's growth, the beating of a turtle's heart and the movement of organisms in Roquefort cheese and in vinegar, without continuous running of the camera and consequent waste of film and power.

If the development of a rose is photographed or a fly shown emerging from its egg, the camera can be shut down and the camera must be controlled to avoid refilling the same picture.

Mr. Clarke has devised an eight-day electric clock which can be set at any desired interval from seconds to half hours. The clock controls an electric motor that cranks the camera.

### Any Old Time

Finding out the time in Alvorito, Ohio, is a tough job. Ask one man and you'll get one kind of time, ask another and you'll be an hour late, and a third, and you might be an hour early. Some folks in this town go by sun time, railroad men by central time and others go by eastern time, which is the official time of the state.

### Queer Luck In China

In certain districts of China each citizen in a village or town is responsible for the behaviour of his ten nearest neighbors. Should one in the circle commit a crime, the whole town must share the punishment equally with the original offender.

## Not Dangerous Occupation

### New Devices Have Made Flying Safer

With the march of science, new machines are being devised to make flying safer, and it is significant that a new publication, "Canadian Aviation," is now issued monthly in Canada. As it is sponsored by the Aviation League of Canada, which is doing much to establish flying clubs throughout the Dominion, it can be regarded as an authentic source of news which will be eagerly read by a large proportion of young Canada, and so its aid in the development of flying in this country it is well come.

Aviation is still a young science, and most people remember the first time they saw an airplane in flight. The path to progress has been strewn with accidents which have taken toll of many brave lives, and it is hard for those who remember all these pioneering fatalities to get rid of the idea that flying is a dangerous occupation.

But as the time issues of "Canadian Aviation" make it clear for themselves.

"During 1927, British air transport lines' machines travelled 873,000 miles, and carried a total of 20,214 passengers, and for the United States alone year had no accidents involving death or injury to any passenger. During 1928 De Havilland's Canadian company machines flew 2,816,126 miles and transported 56,288 passengers without a single fatality."

Parents need not be so backward about letting their boys take up aviation as they once were. The new safety devices which, Sir Alan Cobham says, have made flying safer than motorfaring, and truly a person who flies knows every week learns out that claim.

### Has Accurate Memory

#### Englishman Has Trained His Mind To Remember Dates

On what day did July the first fall—Anno Domini? That was the rather strange question 1 put to Mr. James F. Gillies, writes a Daily Herald Mitchell correspondent. "Without any hesitation," he replied, "on a Friday." "And on what day will December 15 fall—Anno Domini?" "Again the answer came: "On a Tuesday."

Such is the power of Mr. Gillies, who does that through sheer memorizing and nothing else, he can give the day of any date between A.D. 1 and A.D. 4000—a minute and a half day.

## The Immigration Problem

Probably no single question affecting the national life of Canada has called for and received greater attention within recent months than the subject of immigration. It has been debated in church assemblies, Labor Unions, veteran lodges, in Parliament and Legislatures, in the press and upon the public platform. Committees have spent weeks and months studying the problem and have issued reports. The net result is that the Government is advised and urged to adopt this policy and that policy, each one mutually destructive of the other.

On the one hand there are those who contend that only those immigrants who will engage in agriculture should be allowed to enter the Dominion, and that artisans, laborers, and those who naturally locate in cities and large centres of population should be excluded. Others would throw the doors wide open to all classes providing only that they must be healthy both mentally and physically, able and willing to work, and content to abide by and uphold the laws of the Dominion.

Then there are those who would draw a purely racial line of demarcation. They would exclude the so-called "yellow" races; they would bar the negro; they would put a stop to the admission of immigrants from the countries of southern and central Europe. In a word, they would rigidly restrict all immigration except that of people born and bred in the British Isles and speaking the English language.

Still another group places the chief emphasis upon the religion of immigrants. They are opposed to those of other religions than their own. Even if the immigrant be from the British Isles, they have slight welcome for him unless he also be of their religious faith.

So the Government is told that only agriculturists should be admitted into the Dominion, and then only those of the British flag, and having the slightest regard for that cardinal British principle, liberty of conscience, might recognize or enforce any bar to immigration based on the conscientious convictions of the intending immigrant. To do so would be abhorrent to the great mass of the Canadian people and would be equivalent to declaring to the world that Canada was no longer British.

It is equally true that an overwhelming majority of the people of Canada, and this includes all Governments, would like to see a large increase in immigration from the British Isles. Every possible effort is put forth to accomplish this result. Why is it, then, that the annual influx of British immigrants is not much larger?

There are many reasons, but a few may be cited. The number of the British agricultural class is not large, and the surplus available for emigration is practically negligible. British agriculturists can be well employed at home.

Then the British laborer, the woman largely outnumbered the men. In some of the British women are condemned to spinsterhood. For this and other reasons they are invading many employment fields formerly occupied by men, and the necessities of the war gave a great impetus to this movement.

The effect is seen in the rapidly declining birth-rate. In England and Wales the birth-rate fell last year to 18.7 per thousand of the population, as compared with 21.1 in 1923, the last year before the war. In other words, the birth-rate has declined one-third in the short space of fifteen years. There is not, therefore, the same tremendous urge to emigrate as was the case in years gone by.

As a matter of cold fact, the birth-rate is declining among all the white nations. It has long been declining in France; it is declining in Italy, Germany, the United States, Canada. Observers and statesmen in Great Britain, middle class in Canada, do not appear worried over the intermingling of the white people of different nationalities, but they do entertain some fear that, with declining birth-rates almost universal among the peoples of the white nations, the white race will lose its supremacy and world leadership. They foresee the day when the "yellow" race of the United States will outnumber every so far as Europe is concerned, because there will be a shortage of "whites," let alone a surplus to emigrate.

Notwithstanding this way, and the many conflicting views that prevail, it is agreed by most Canadians that this Dominion is in need of a much larger population—a population which is not being provided by natural increase as a result of the prevailing low birth-rate. If immigration to Canada is to be increased, then there must be some compromise effected between those who insist on agricultural settlers only, and those who would admit only those who would serve to swell the ranks of the particular religious denomination, and some compromise on the issue that ability to speak English is the hallmark of good citizenship and the only guarantee of success.

The man who says what he likes will hear many things that he dislikes.

## TIRED, WEAK, NERVOUS WOMAN BENEFITED

Praises Lydia E. Pinkham's Vegetable Compound

Athens, Miss., Quebec—"After the birth of my second child, I was very nervous and weak and had a great deal of backache and terrible pains every month. I suffered two years before I tried Lydia E. Pinkham's Vegetable Compound. I got four bottles at first and it did me a great deal of good. I would not be without it in the house now and have another six bottles in. I recommend it to every woman I know."  
HARRIS, Box 114, Athens, Miss., Quebec.

## Train Searches For Bumps

English Railway's Method of Knowing Where Tracks Need Attention

A mysterious train travels on the main lines of the Great Western Railway, England, and yet it does not appear in any time-tables, and never stops to pick up passengers. Its duty is to search for bumps on the permanent way, and runs are made from Paddington and Newport. The conductor consists of a number of various kinds, fitted with different bogies.

An observer stands over each bogie, and when he feels the slightest jolt he releases a signal of white-wash on the track as a guide of the spot needs attention. Various colored washes are used, such as green, red, white, blue and yellow, each signifying different kind of bogie.

A machine in the back of the train makes a graph of all the jolts, and on the return journey stops are made to examine the line where wash has been dropped. Experts then take measurements and notes for future repairs.

## The Minister Of Agriculture

Hon. Mr. Motherwell Signally Honored By The Province Of Quebec. The honor conferred upon Hon. W. H. Motherwell, Dominion Minister of Agriculture, by the Quebec provincial government, must surely be a particularly gratifying mark of distinction. At the recent convention of the Society of Canadian Technological Agriculturists, the province of Quebec bestowed the order of Commander of Agricultural Merit—upon Mr. Motherwell.

Many statesmen in the past have been honored for having achieved great things in war and in diplomacy. Mr. Motherwell's distinction has been won in the realm of the plowshare rather than of the sword. Millions of blades are annually unsheathed in Canada under the energetic urge of the minister, but they are blades of wheat. Instead of the cattle and machine guns, the roar of tanks, the oncoming of Mr. Motherwell's army is heralded by reapers, tractors and threshing machines. It is surely well to honor such generalship of peace.—OTTAWA CITIZEN.

## WAS VERY DELICATE

New Health Came Through Using Dr. Williams' Pink Pills

Mrs. Chaparral, Lourdes, N.S., says that twice in her lifetime she has reason to be thankful for what Dr. Williams' Pink Pills did for her. She says: "I was a very delicate child. I was a sufferer from cramps and pains every month and was hardly able to move around at all. One day when I was six years old, a friend came in to see me, and she said to my mother, 'What is the matter with that child?' Dr. Williams' Pink Pills. I know they will do her a world of good."

One day when I was six years old, a friend came in to see me, and she said to my mother, 'What is the matter with that child?' Dr. Williams' Pink Pills. I know they will do her a world of good."

Recipes For This Week

(By Betty Barrett)

CREAMED PEAS

1 cup peas drained or  
2 cups fresh peas.  
2 cups milk.  
4 tablespoons butter.  
1 teaspoon salt. Pepper.

Make cream sauce by melting the butter, add the flour to make a smooth paste. Add the milk, stir at a time, stir to avoid lumps. Add seasoning and peas. Heat in double boiler until the peas are thoroughly warmed.

ORANGE PINWHEELS

1 cup flour.  
2 teaspoons baking-powder.  
1 teaspoon salt.  
2 tablespoons butter.  
2 cups milk.  
2 tablespoons sugar.  
1 tablespoon orange juice.  
Orange rind.

Mix and sift flour, baking-powder, salt, sugar and orange juice. Add the milk, stir to avoid lumps. Add seasoning and peas. Heat in double boiler until the peas are thoroughly warmed.

## Brings Trophy To Canada

Joe Wright, Toronto, Wins Diamond Sculls At Henley

For the second time in history the Diamond Sculls, premier event for the supremacy of amateur scullers in the world, was won by a Canadian, when Joe Wright, of the Argonauts Rowing Club, Toronto, defeated R. Y. Lee, of Worcester College, Oxford, in the final heat by a full length. In avenging his unlovely defeat of the 25-year-old Argonaut sculler who had won the premier singles diadem in Canada for the first time since 1904 when Lou Schotes, of Toronto, won the honor.

The Torontonians from whom victory was snatched by a "misfortune" in last year's final against Lee, accomplished his revenge in 12 seconds faster than Lee's time last year, when the Canadian craft met disaster 10 feet from the finishing post.

Ever since Wright's defeat in 1927, when he showed his superiority over Lee only to lose the race when his boat became entangled in a punt rope when he was within a few strokes of triumph, the Argonaut sculler had expressed his determination to vindicate himself. It was his hope that the draw would keep Lee and himself in different halves so that they could meet again in the final race.

Captain Lou Schotes, of Toronto, was the only other Canadian to win the Henley singles classic, winning the event in 1901. Wright is the son of Joe Wright, Jr., who acted as his coach, and who was a famous sculler in his younger days. Joe Wright, Sr., now an alderman in Toronto, was formerly a rowing coach at several universities in the U.S.

## Caring For Eskimos

Canadian Government Watches Over Eskimos In Desolate Regions

North America, one must assume, has got its affairs into very good order when, as a matter of routine administration, the Canadian Government provides a reindeer to supply food for Eskimos in danger of starvation in distant and desolate regions along the Mackenzie River. Not the extreme part of this vast territory lies outside the attention of authorities. Very little time has passed since the Eskimo of the North, the claps of the great plains starved on occasion or died of disease without notice, but now even the nomads along the Arctic Ocean are under observation.

A University dramatic society intimated to Mr. Bernard Shaw that they would perform one of his plays if he would grant permission.

His reply was brief: "You can't, but you may as well try."

The Family Physician.—The good doctor is not always willing to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Eucalypti Oil, which is wonderfully effective in easing all inflammatory pains and healing cuts, scratches, and sprains.

The presence of this remedy in the family medicine chest saves many a fee.

X-Ray Prevents Smuggling. A terror for smugglers is at the new electrical bottle which has been opened in Baker Street, London. It is an American X-Ray apparatus from Germany which will show exactly what is in the box full of goods or any article lodged in a human body. Packages or anything made of wood could be X-rayed, thus saving customs officers unpacking them.

### WORLD HAPPENINGS BRIEFLY TOLD

The Canadian Copyright Act is likely to be revised at the next session of Parliament in line with the copyright convention which has just ended at Rome.

As a site for the farms and homes of Sweden's youth, the Peace River District and the vast stretches of the Canadian north will be studied by a commission from Sweden.

The Dominion bureau of statistics reports six successful days in Canada credited to automobile accidents in 1927, against 406 in 1926, an increase of 15.6 per cent.

A check of \$1,000 has been received by Commander Richard E. Byrd from Charles A. Lindbergh, as his contribution to the fund being raised for the Byrd Antarctic Expedition.

Veteran of the South African War and the Red Rebellion, and former assistant commissioner of the Royal Canadian Mounted Police, Lieut.-Col. F. J. A. Demers, 62, died suddenly at Edmonton.

Against the wishes of Marshal Foch, a bronze equestrian statue of himself was unveiled at Cambray, Northern France, before a throng that included 100,000 French soldiers, France, headed by Premier Poincaré.

In accordance with a custom established shortly after the war, about 1,000 London school children made a pilgrimage to Shorncliffe Garrison Cemetery and decorated the graves of Canadian soldiers.

Fifty-three million dollars of Dominion of Canada war loans, which mature in October, will be paid in cash. Hon. J. A. Robt, minister of finance, states that these obligations would be met out of money in the treasury.

The fears of war pensioners that the British Government intends to reduce pensions because of the decline in the cost of living since they were granted, have been allayed by Sir William Joynton-Hicks, home secretary.

Omnibus lines are still a favored method of transportation in London and several large European cities.

Many a man fails to recognize his duty when he sees it.

"My lover is coming for me in a car—I hope he can steer with one hand!"—Journal Amuseant, Paris.

## Was President Of Alberta University

Dr. Wallace of Manitoba Has Exceptional Attainments

Dr. L. C. Wallace, whose appointment to the presidency of the University of Alberta was officially announced recently, is at present head of the department of zoology and geology of Manitoba University and commissioner of mines for the province.

A man of exceptional erudition, Dr. Wallace came to Canada in 1910 from Scotland. In that year he became lecturer in zoology and mineralogy and was appointed professor in that department.

He was born in Orkney, Scotland, and educated in Deacons Public School, Kirkwall, turgish school, Edinburgh University, where he obtained his first three degrees in 1907, 1907 and 1912, respectively, and Georgetown University, where he graduated with a Ph.D. degree in 1917.

In 1918 he was appointed commissioner for Northern Manitoba with headquarters at The Pas, Man., a position he held until 1921 when he was appointed a member of the board of trustees of the provincial library and museum.

Dr. Wallace was elected vice-president of the Canadian Institute of mining and metallurgy and a fellow of the Mineralogical Society of America. He is also a Fellow of the Royal Society of Canada and of the Geological Society, London.

In the midst of his arduous teaching, exploration and field work Dr. Wallace has found time to write copiously of the subjects in which he has earned fame.

## Winnipeg Newspaper Union

Our next stop was Frothingham Bacon Factory, a co-operative concern formed thirty-three years ago and which has paid all its taxes. It now has a weekly supply of 2,500 pigs, handles eggs from 5,000 poultry farms and has paid all its taxes. It is in the building and re-building of the factory. As we saw the live pigs coming in to the factory we were astonished at their numbers, but still more at the uniformity of the bacon sides which they produced. It was interesting to observe, however, that at the time of our visit only 20 per cent. of the sides were weighing 45 cent. 2 and 30 per cent. No. 3. In the summer the number of sides run somewhat higher, up to 25 and 30 per cent. but the grading is very close indeed. We were fortunate in meeting the director of the factory, Mr. F. L. Larson, who has been in charge since its inception. He is probably the best informed man in Denmark on the bacon business. He is secretary of the committee which meets weekly to fix the prices to be paid for hogs by the bacon factories throughout the country, and chairman of the committee which fixes the prices to be paid for eggs by those bacon factories handling them. It is worth noting that Mr. Larson, president of the factory, counts it a poor year when he has to make less than \$5,000 net profit from his own farm. His worst year showed a net profit of \$2,000.

This informative visit was followed by a tour of Frederiksborg Castle, founded by King Frederik II, but now a national museum of historical portraits and paintings arranged in rooms furnished in keeping with the various periods. Here we saw the finest relief ceiling in Europe, but the most treasured feature was two pictures of more recent date. The one depicted the king at the end of a flag by the inhabitants of Schleswig, and the other the king at the end of a flag by the inhabitants of Germany in 1865, and the other the king at the end of a flag by the inhabitants of Germany in 1865, and the other the king at the end of a flag by the inhabitants of Germany in 1865.

Great War, he visited his reclaimed subjects and the buried flag now brought forth to the light of day was

Unusually attractive is this chic frock of youthful charm. The two-piece flared skirt, sailor collar, foundation, and the bodice is gathered at the lower edge to give the modish blouse effect. Three bands of material or lace are arranged at the hips, and there are tucks at the front of the neck. Ribbon forms a collar and is also used on the long dart-fitted sleeves. The sleeves may be omitted and a ribbon girdle added for evening wear. No. 1075 is in sizes 16, 18, and 20 years. View "A," size 18 (36 bust), requires 3 1/2 yards 29-inch, or 2 1/2 yards 44-inch material, and 4 yards 29-inch ribbon. View "B," size 18 (36 bust), requires 2 1/2 yards 29-inch material, 5 yards 29-inch ribbon, 5 yards 44-inch lace. Price 25 cents the pattern.

The State of Yucatan, Mexico, which is known to historians and archaeologists as the seat of one of the highest civilizations in the western world, is now boasting that it is the world's greatest producer of henequen, from which binder twine is made.

"I don't even know if I'd have enough room for you to do."

"Oh, that wouldn't matter, provided the pay was satisfactory."

Germany, under Blomberg in 1931, was the first country to undertake unemployment insurance.

## Farmers' Marketing Tour

Canadian National Railway Tour To Great Britain and Denmark, 1928

(Continued.)

The culmination of this eventful day in Denmark's capital, Copenhagen, with high tea at the house of Mr. J. M. Drøge, the Danish Charge d'Affaires, where, as co-leader of the tour, we were met by Madsen Mygkild, the Danish Prime Minister, and other representative Danish officials present for the special appearance of Prince Axel, Denmark's second son.

From the castle we passed to what was perhaps the strangest feature of the tour in Denmark. This was the People's High School at Frederiksborg. What we had been adding ourselves, was the secret that the Danes possessed that seem to make all Danes brothers, in a sense, not to be observed perhaps in any other nation. How did they cooperate so wholeheartedly and yet preserve their individuality. We believe we found it that afternoon, when Dr. Frederik Drøge spoke to us on the Danish Folk High School. Here was a school attended, in winter, by young men and in summer by young women, a type of school which is often owned by an individual, but which is run by the state. What is it, nevertheless, in no way amenable to the state as to its curriculum. What object could there be in such a school? Here is the answer.

What object could there be in the imparting of knowledge, but for the sake of knowledge itself? The fare at schools such as these is plain, the life Spartan. The pupils are not allowed to wear hats, and high patriotism and high ideals. When the soul of the young man and woman, said the Folk High School, and there will result perception of the teacher who is born, whose heart and soul are in his work, and whose work will live when he and his age goes.

(To Be Continued.)

Industries In British Columbia

There are now 1,138 industrial establishments in the province of British Columbia with an annual payroll of \$157,550,820, an increase over 1918 of 300 per cent. The principal industries of the province are lumber and shingle mills, mining, salmon, halibut and herring fisheries, foundries and structural steel works, sugar refining, shipbuilding, pulp and paper, clothing, food products, glass and rubber.

Mr. Moser: "Val would you like for your dinner, Able-mutton or venison?"

Mr. Moser: "Mutton, my dear. Mutton is 'sheep,' but venison is 'deer.'"

Don't be afraid to speak out loud. The world is too busy to listen to whispers.

"What is the first thing that turns green in the spring?"

Christmas jellyfish."

DEMOCRATIC STANDARD BEARER

How the oldest naval officer on active service devoted enemy submarines with dunnell battleships while the real ships were actively engaged hundreds of miles away is recalled by the death of Captain W. B. Forbes, R.N., of Quenington, Gloucestershire.

When the war broke out Captain Forbes, who was 60, was living in retirement in Ireland. He volunteered for active service and was given command of a dunnell ship called "No. 4," stationed in Lock Ewe.

In 1915, when in his 70th year, he was given command of a fleet of dunnell ships in the Aegean. He sailed in a reproduction of H.M.S. Tiger, called "No. 14," with three other cleverly disguised dunnells.

These queer craft appeared off Gallipoli in the early months of 1915, dodging and deceiving enemy submarines.

Eventually the imitation Tiger was torpedoed, but instead of her guns sinking they rose to the surface and dashed away with their tremendous torpedoes of wood.

Her commander so admirably handled the situation that the only dunnell were four killed by the explosion.

## SUNDAY SCHOOL LESSON

JULY 22

SAUL'S EARLY MINISTRY

Golden Text: "Straightaway in the synagogues he proclaimed Jesus, that He is the Son of God." Acts 13:45.

Lesson: Acts 9:36-38; 11:30-12:23; Galatians 1:10-18.

Devotional Reading: Romans 12:1-8.

Explanations and Comments

Paul's Preparation in Arabia For his Ministry, Galatians 1:15-18. — Luke says nothing about Paul's stay in Arabia, but Paul writes in his Epistle to the Galatians: "When it was the good pleasure of God to reveal His Son in me, that I might preach Him among the Gentiles, straightaway I conferred not with flesh and blood, neither went I up to Jerusalem to them that were apostles before me, but I went away into Arabia, and again I returned unto Damascus. Then after three years I went up to Jerusalem."

It was a voluntary journey, then, a period of reflection and retreat, during which the truth which he had been so abruptly called to preach might be assimilated and clarified. "But I have been as Mount Sinai, yet it is possible that he went no farther than the desert region near Damascus, where he might somewhat loosely have been known as a character, 'the Arab.'"

It was in his public ministry, before he came upon his Paul, went out into the wilderness, and there he fought his battles and think his problems.

"The soul," said Robertson, "went through a period of reflection and retreat, during which the truth which he had been so abruptly called to preach might be assimilated and clarified."

It was a voluntary journey, then, a period of reflection and retreat, during which the truth which he had been so abruptly called to preach might be assimilated and clarified."

It was a voluntary journey, then, a period of reflection and retreat, during which the truth which he had been so abruptly called to preach might be assimilated and clarified."

THE WONDER OF RADIIUM

Although Widely Used It Is Still Something of a Mystery

When medical men first used radium in surgery, our knowledge of that uncanny element was of the slightest. Even now, when so much can be achieved by its aid, this radium-active body (so called because of the radiation it is perpetually throwing off), is something of a mystery.

It is constantly firing off the atoms of which it is composed—a kind of non-stop high explosive in miniature. It takes twenty-five years to decay, and while it can disintegrate to disintegrate. Therefore the radio activity of a pure radium preparation continues for an average of 2,500 years, and while it can disintegrate or break down no further it ends its rate, so to speak, as it emits its light.

This wonderful element occurs in small quantities in certain mineral deposits, of which the richest are in the Belgian Congo.

In its metallic state, radium is a pure white metal which changes rapidly when exposed to air and requires special measures for curative purposes, it is always prepared and used in the form of a salt, usually as bromide of radium.

It was discovered as a curative agent was discovered by accident. A French scientist put some tubes containing radium in his pocket and carried them about with him for some days, when he discovered that his skin was burnt. This suggested the use of radium, radiations to kill certain living cells or tissues considered harmful to man. But medical reports on these results were confusing. Accurate details of the nature of the disease treated, the method of application, and the dosage used were lacking. Doctors could not with confidence recommend its use, so it fell into disrepute.

Then the Medical Research Council took the matter up and made an extended and co-ordinated inquiry into the medical uses of radium, especially in cancer and kindred diseases. Doctors could not with confidence recommend its use, so it fell into disrepute.

Many Forgetful People

In four months, this year, more than \$50,000 worth of jewelry has been left in taxicabs in New York. Forty-five out of every hundred pieces of jewelry, brief cases, luggage, umbrellas, canes and other articles were found by drivers after their fares had departed.

There is no duty on the wool that the radiators pull over the eyes of the voter.

The President of the United States who served two non-secutive terms was Grover Cleveland.

A partnership is a business combination in which each man believes he carries the heavy end of the log.

DIARRHŒA Was So Bad Child Passed Blood

"My Harry Nobles, R. R. No. 2, Shannon, N.B., writes: 'Last fall my little boy lost his life to a diarrhoea and before I knew it he was passing blood. I went to my medicine chest and gave him a dose of'

Dr. Fowler's Wild Strawberry

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child.'

A wonderful bowel complaint remedy has been on the market for over 60 years; put up only by The T. Millar Co., Limited, Toronto, Ont.

## RESCUE EFFECTED OF MEMBERS OF THE ITALIA CREW

London.—Despatches received here from Virgo Bay and from Rome informed that the members of the Italia crew, former companions of General Noble, who have been in desperate need of help, were rescued by the Russian relief ship Kowloon, and that three other men, apparently members of a dog sled expedition to rescue the Italia crew, have been sighted.

This news, coupled with the news from Moscow, that two Italians, Mariotto and Zappi, had been rescued after 43 days of wandering on Arctic ice and the body of Dr. Malgren, had been recovered, constituted the most successful day of rescue operations since the dirigible Italia crashed May 25, after a flight over the North Pole.

Battling her way through a sea of broken ice cakes, the Kowloon pushed her nose to the point far off Northeast Land, where a tiny tent painted red marked the camp of five members of the crew of the wrecked polar dirigible Italia.

The starved, frail men who had suffered starvation and freezing temperatures since May 25 were taken aboard, it was announced in advices from Rome.

The second group sighted was believed to be the daring men who had been sent out by dog sled to aid the stranded Italia crew and were lost. It was believed this latter party was that commanded by Captain Sera, an explorer, who set out with two companions.

The Kowloon ploughed her way to the Viglietti group in a sensational dash to the day's work. Five Italian messengers from her report she radioed to Virgo Bay that she had sighted a group of men, "waving frantically. Presumably the Sera group, who had been sent out by dog sled to aid the stranded Italia crew, and were lost."

The Russian ship at the time was passing nearly the exact spot where the Italia crashed on May 25, killing one of her crew, injuring two seriously, and drifting away in a stiff wind with six men aboard.

The survivors in the Viglietti group who were rescued, were believed to be Lieut. Vilgati, Italian navy navigator, Giuseppe Wangi, radio operator, who had left the group's launch with the world; Filippo Tronzi, engineer; and Professor F. Debonac, meteorologist.

The group had been sending radio messages to the Kowloon reporting their growing discouragement and it was believed the four men were in such serious condition that only speedy medical attention would save their lives.

## Meeting In Regina

### Of Noted Barristers

Representative Attending From England, France, Italy, Free State and U.S.A.

Regina.—Preparations for the most brilliant assemblage of legal talent ever to gather in this city were here. Next month, the 13th annual meeting of the Canadian Bar Association will be held in this city, with headquarters in the Hotel Saskatchewan.

From the Maritime and the Pacific Coast, outstanding public men will come for the yearly conference. From France, Great Britain, the Irish Free State and the United States, representatives of other legal bodies will be present to aid and learn in the great meeting. The convention will last three days, August 20, 20 and 31. Hon. Mr. Justice W. M. Martin, president of the Canadian Bar Association, will be in the chair when the meeting opens at 10 a.m. on August 20. He was elected at last year's annual meeting, held in Toronto.

## Climber Conquers

### Mount Scott

Philadelphia Man With Three Companions Reach Summit

First prize Lodge, Alta.—For the first time in its history Mount Scott, the peak in Jasper National Park, named after the gallant hero of the South Pole, has been conquered. The successful climber is Dr. J. Monroe Thornton, of Philadelphia, noted biologist and author of "The Mountains of Canada." With him were Dr. Max Struass, also of Philadelphia, a member of both the American and the Italian Alpine Club; William Hainworth, of New Haven, Conn., and Julian Hillhouse, of Newton, Conn. The altitude of Scott is 10,826 feet.

W. N. O. 1742

## Lord Byng's Appointment

In Government Measure To Restore Confidence In Public Force

London.—The appointment of Viscount Byng, of Winchelsea, as commander-in-chief of Metropolitan police, announced by the government to have been a measure to restore confidence in the police force, was welcomed in Parliament when a Labor motion of disapproval was defeated, 231 to 106.

Mr. William Johnson-Hicks, the Home Secretary, in making the announcement, declared that so shaken was the public faith in the police department that he had reluctantly called upon Lord Byng, because the force needed, not re-organization, but re-inspiration.

Labour's opposition to the appointment of Lord Byng was based on the ground that it might tend to militarize the force. This Sir William denied.

Viscountess Astor and Miss Ellen Wilkinson, the woman Labor member of Parliament, were among the property of Lord Byng's appointment, found themselves in union in expressing satisfaction at the resignation of Sir William Hicks, and the fact that he had resigned, they said, had tended to drive policemen from the force and worse than that, women were concerned had been reactionary.

Lord Byng's appointment was announced a few weeks after the dismissal of charges of improper conduct against Miss Irene Savidge and Sir Leo Motley, who were arrested in Hyde Park. In connection with Miss Savidge's examination the accusation was made that the police had used the third degree methods.

## Cruiser Dauntless Relieved

Will Be Placed In Halifax Drydock For Repairs

Halifax, N.S.—The British light cruiser "Dauntless," which hung up on a prong of Tribune ledge at the entrance to Halifax harbor on July 2, has been declared out of action after strenuous preparation by the wrecking crew of the Halifax shipyards.

The Dauntless was at once towed up the harbor and tied up to the piers in Mill Cove, Dartmouth, awaiting a berth in the drydock, and will be kept there by the compressed air pumps which were installed on her decks a week ago and which have been kept going continuously ever since.

The Dauntless will be placed in the drydock of the Halifax shipyards, where it will be repaired for four months. It had been ascertained early that the rocks had torn a 50-foot hole in the cruiser's bottom.

"Thousands of persons gathered along the shore; on Citadel Hill and harbor craft to witness the floating of the Dauntless from its precarious position."

## Toronto Mail Robbery

Five Men Under Arrest Charged With Complicity

Toronto.—Five men are under arrest here charged with complicity in the robbery of the Canadian National Railway mail car at the Union station in the early hours of June 20, was announced by General D. C. Draper, chief of police. One woman is held on a charge of vagrancy and another as a material witness.

Although it has been generally rumored for several days that some arrested had been made confirmation had been made that the four men were not obtainable from the police.

Finlay McLeod, 38, 48, of Toronto; Everett McKibbin, 33, barber of Detroit; and John Brown, alias Sullivan, 28, Toronto cigar store clerk, are charged with robbery. Finlay McLeod, 24, Toronto newspaperman; Alex. McLeod, 42, of Toronto; and one woman, who was arrested on the spot, are charged with receiving stolen goods.

## Will Investigate Tariff Proposals

Ottawa.—Hon. James Frobisher, Minister of Finance, has left Quebec for a tour in England. While there he will look into the new tariff proposals of the Irish Free State and he is expected to take up with William Cosgrave, president of the executive council, the matter of extending to Ireland the provisions of the Canadian tariff. The Canadian proposals, which are subject to reciprocal treatment for Canadian goods on the part of the Free State.

## To Study Canadian Methods

London.—With the object of studying Canadian methods and institutions in connection with the National Chamber of Trade and Commerce, a delegation of the National Chamber of Trade and Commerce, headed by its president, Mr. J. H. Macdonald, will be in Montreal, Quebec, this week will be spent making a tour of the two countries.

## Might Be From Tropics

Unusual Exhibit Will Be Seen At Edmonton Exhibition

Edmonton.—Grapes, sorghum, sugar cane, sugarcorn, banana, guava, such a list reads like the exports of some tropical island, or at the very least, the products of a southern climate.

Visitors to the Edmonton Exhibition will have the opportunity of checking up on the list, for the products mentioned will be included in the entry from the C.M.R. Irrigation Development farm at Brooks, Alberta, which will be staged in the Agricultural building.

Throughout the week fresh supplies of the products quoted will be brought to Edmonton from Brooks in order to keep the display fresh and attractive.

## Successor Not Named

Manitoba Government Has Not Filled Dr. Wallace's Position

Winnipeg.—No decision as to who will succeed Dr. R. C. Wallace, of the Manitoba University, as commissioner of mines and natural resources has been reached by the provincial government.

Dr. Wallace was recently given the post of president of the University of Alberta, and has relinquished his position as head of the geology department of the university of Manitoba to take over with new post since in June in September.

## MANITOBA TO OBTAIN CONTROL OF RESOURCES

Ottawa.—The Federal Government and the government of the province of Manitoba have reached an agreement, as to the method and basis of settlement of the question of the administration and control of the natural resources of Manitoba. Premier Mackenzie King has issued a statement covering the agreement arrived at.

Under the agreement the "federal" question of financial adjustment is left to a committee which will be appointed by the Federal Government with the concurrence of that of Manitoba. The two governments have agreed on the following principles as members to comprise the committee: Hon. W. A. Tupper, of the Saskatchewan Court of Appeal; Hon. T. A. Cress, of Winnipeg; and Charles M. Bowman, of Waterloo, Ont.

Mr. Cress occupied the post of minister of agriculture at Ottawa for some time and was also leader of the Progressive Party. Mr. Bowman is a director of the Mutual Life Insurance Company, of Canada.

Mr. King announced that these gentlemen would be apprised immediately of the agreement and that they would be invited to accept appointment.

## WEST'S NEW PLAYGROUND

By the Rt. Hon. W. L. M. King

Prime Minister of Canada. Premier King represents Prince Albert in the House of Commons and his constituents are presenting him with a cottage on this lake.

In addition to the Prime Minister, many other men notable in the public life of Canada, will attend. The programme will extend over a period of two days and special housing accommodation has been arranged by the committee.

The photograph shows a view on Kingsmere Lake, a typical body of water in this new and beautiful playground of the nation.—Photograph by Canadian National Parks.

Heckled by Col. Joshua Wedgwood, Labor, who asked if Sir Sturges intended "to visit this proposal," the foreign secretary declared:

"I do not propose to wreck the proposal. I welcome the proposal and wish to bring it to a successful conclusion."

Paris.—The Council of Ministers has approved foreign minister Briand's reply to Secretary Kellogg's proposals to outlaw war which France formally agreed to sign.

Heckled by Col. Joshua Wedgwood, Labor, who asked if Sir Sturges intended "to visit this proposal," the foreign secretary declared:

"I do not propose to wreck the proposal. I welcome the proposal and wish to bring it to a successful conclusion."

## INDUSTRIAL CONTROVERSY

Marketing Surplus Wheat

Carry-Over Of 1927 Crop May Be \$60,000,000 Bushels

Port William, Ont.—A welcome revival in the movement of western grains and favorable for the coming harvest, were main features of the June report of R. A. Truett, statistician to the board of railway commissioners. A marked improvement developed toward the end of June in the marketing of the exportable surplus of Canadian wheat with the result that lake shipments increased substantially.

The increase in lake shipments was most welcome as providing storage space for most of the grain in transit from western points.

Lake shipments during July are expected to be quite heavy and will make room for the stocks at present in country elevators at interior points which must be shipped out in readiness for the new crop.

At the end of June there were 70,000,000 bushels of wheat in store in the western division, 8,000,000 bushels in transit to terminals, approximately 2,000,000 had been milled for use for seed and another 307,250,000 bushels had been shipped out of the division. Allowing for what was shipped on July 13, 1927, it would thus appear the net total of the 1927 wheat crop already accounted for is more than 420,000,000 bushels.

It looks as if the carry-over at the close of the present season would be very close to 60,000,000 bushels or less exports during the present month far exceed expectations.

## Prize List Drafted

Six Wheat Classes In World's Grain Show Awards

Regina, Sask.—For the purpose of having out a prize list for the World's Grain exhibition and conference to be held in Regina in 1932, a tentative classification has been prepared by a special committee nominated by Hon. W. R. McPherson, Dominion minister of agriculture. The committee is composed of J. A. Mooney, of Ottawa; L. H. Newman, Carl Sauer, Dr. Mercille, and G. H. Clark, all of Ottawa.

Exclusive of special classes for tentative list makes provision for \$20,250 in prizes; six classes of wheat with \$100,000 in prizes, two classes of oats, with \$50,000 prize; five classes of barley, with \$15,000 prizes; three classes of field peas, with \$10,000 prizes; two classes of soy beans, \$10,000; one class of flax, \$2,000; five classes of buckwheat, \$3,000; four classes of corn, \$20,000; one class of rice, \$2,000; two classes of millets, \$2,000; one class of red clover, \$1,000; one class of alfalfa, \$1,000; one class each in sweet clover, timothy, brome grass, mangels and turnips, \$500 each.

Under the agreement the "federal" question of financial adjustment is left to a committee which will be appointed by the Federal Government with the concurrence of that of Manitoba. The two governments have agreed on the following principles as members to comprise the committee: Hon. W. A. Tupper, of the Saskatchewan Court of Appeal; Hon. T. A. Cress, of Winnipeg; and Charles M. Bowman, of Waterloo, Ont.

Mr. Cress occupied the post of minister of agriculture at Ottawa for some time and was also leader of the Progressive Party. Mr. Bowman is a director of the Mutual Life Insurance Company, of Canada.

Mr. King announced that these gentlemen would be apprised immediately of the agreement and that they would be invited to accept appointment.

## Hold Memorial Service

Brussels.—An impressive memorial service for Captain Alfred Loewenstein was held in the church of St. Michael and St. Gudule. A tall catafalque surrounded by candles had been erected in the nave of the church and the choir was in black. Madame Loewenstein, her son and members of the Loewenstein family were present, as well as many persons prominent in Belgian life.

## Marketing Surplus Wheat

Carry-Over Of 1927 Crop May Be \$60,000,000 Bushels

Port William, Ont.—A welcome revival in the movement of western grains and favorable for the coming harvest, were main features of the June report of R. A. Truett, statistician to the board of railway commissioners. A marked improvement developed toward the end of June in the marketing of the exportable surplus of Canadian wheat with the result that lake shipments increased substantially.

The increase in lake shipments was most welcome as providing storage space for most of the grain in transit from western points.

Lake shipments during July are expected to be quite heavy and will make room for the stocks at present in country elevators at interior points which must be shipped out in readiness for the new crop.

At the end of June there were 70,000,000 bushels of wheat in store in the western division, 8,000,000 bushels in transit to terminals, approximately 2,000,000 had been milled for use for seed and another 307,250,000 bushels had been shipped out of the division. Allowing for what was shipped on July 13, 1927, it would thus appear the net total of the 1927 wheat crop already accounted for is more than 420,000,000 bushels.

It looks as if the carry-over at the close of the present season would be very close to 60,000,000 bushels or less exports during the present month far exceed expectations.

## Prize List Drafted

Six Wheat Classes In World's Grain Show Awards

Regina, Sask.—For the purpose of having out a prize list for the World's Grain exhibition and conference to be held in Regina in 1932, a tentative classification has been prepared by a special committee nominated by Hon. W. R. McPherson, Dominion minister of agriculture. The committee is composed of J. A. Mooney, of Ottawa; L. H. Newman, Carl Sauer, Dr. Mercille, and G. H. Clark, all of Ottawa.

Exclusive of special classes for tentative list makes provision for \$20,250 in prizes; six classes of wheat with \$100,000 in prizes, two classes of oats, with \$50,000 prize; five classes of barley, with \$15,000 prizes; three classes of field peas, with \$10,000 prizes; two classes of soy beans, \$10,000; one class of flax, \$2,000; five classes of buckwheat, \$3,000; four classes of corn, \$20,000; one class of rice, \$2,000; two classes of millets, \$2,000; one class of red clover, \$1,000; one class of alfalfa, \$1,000; one class each in sweet clover, timothy, brome grass, mangels and turnips, \$500 each.

Under the agreement the "federal" question of financial adjustment is left to a committee which will be appointed by the Federal Government with the concurrence of that of Manitoba. The two governments have agreed on the following principles as members to comprise the committee: Hon. W. A. Tupper, of the Saskatchewan Court of Appeal; Hon. T. A. Cress, of Winnipeg; and Charles M. Bowman, of Waterloo, Ont.

Mr. Cress occupied the post of minister of agriculture at Ottawa for some time and was also leader of the Progressive Party. Mr. Bowman is a director of the Mutual Life Insurance Company, of Canada.

Mr. King announced that these gentlemen would be apprised immediately of the agreement and that they would be invited to accept appointment.

Brussels.—An impressive memorial service for Captain Alfred Loewenstein was held in the church of St. Michael and St. Gudule. A tall catafalque surrounded by candles had been erected in the nave of the church and the choir was in black. Madame Loewenstein, her son and members of the Loewenstein family were present, as well as many persons prominent in Belgian life.

## BRITAIN WILL REPLY TO U.S. ANTI-WAR NOTE

London.—The British reply to the American anti-war proposals in the opinion of Sir Austen Chamberlain, secretary of foreign affairs, will be forwarded to Washington before the end of the parliamentary session. The secretary made this announcement in the House of Commons in reply to questions and he took the responsibility for the delay in answering the American note.

The only delay, however, said Chamberlain, was the time which was being taken for careful consideration of such an important matter and the Dominions had no responsibility for this.

Heckled by Col. Joshua Wedgwood, Labor, who asked if Sir Sturges intended "to visit this proposal," the foreign secretary declared:

"I do not propose to wreck the proposal. I welcome the proposal and wish to bring it to a successful conclusion."

Paris.—The Council of Ministers has approved foreign minister Briand's reply to Secretary Kellogg's proposals to outlaw war which France formally agreed to sign.

Heckled by Col. Joshua Wedgwood, Labor, who asked if Sir Sturges intended "to visit this proposal," the foreign secretary declared:

"I do not propose to wreck the proposal. I welcome the proposal and wish to bring it to a successful conclusion."

Paris.—The Council of Ministers has approved foreign minister Briand's reply to Secretary Kellogg's proposals to outlaw war which France formally agreed to sign.

Heckled by Col. Joshua Wedgwood, Labor, who asked if Sir Sturges intended "to visit this proposal," the foreign secretary declared:

"I do not propose to wreck the proposal. I welcome the proposal and wish to bring it to a successful conclusion."

Paris.—The Council of Ministers has approved foreign minister Briand's reply to Secretary Kellogg's proposals to outlaw war which France formally agreed to sign.

## PREMIER KING WILL VISIT WEST EARLY IN AUGUST

Ottawa.—A tentative schedule for the western trip of Premier Mackenzie King was issued from the office of the prime minister. It is not Premier King's speaking schedule, and he will not deliver speeches at all the points named. He will, however, speak in Prince Albert, his own constituency, where he attended the opening of the Prince Albert National Park, and also the Prince Albert exhibition. His stay in the constituency of Prince Albert will comprise six days.

Premier King will leave Ottawa on Thursday, August 2, arriving in Winnipeg on the following day. He will leave Winnipeg on Sunday, August 5, arriving in Brandon on Monday, the 6th, leaving Brandon on Tuesday, the 7th, and reaching Regina on Wednesday, August 8, and remain there until August 10, and remain there until August 12, and remain there until August 14, and remain there until August 16, and remain there until August 18, and remain there until August 20, and remain there until August 22, and remain there until August 24, and remain there until August 26, and remain there until August 28, and remain there until August 30, and remain there until September 1, and remain there until ## OUR POLICY

It is the purpose of the Independent to serve the rural community as well as the urban. We cannot gather rural news on our own and depend on outsiders for news of their districts. Every subscriber submitting items of their neighborhood confers a distinct favor on us and to their neighbors.

We know that of every district there are a few who invariably knock the town; that claim the townspeople are working solely for their own interest and only care for the country people to exploit them. This is a very wrong view point. One cannot exist without the other. The town belongs to the country people as much as it does to those who reside in it. In order to

have a good town there must be public spirit on the part of both town and country people. The town people must realize that they are but servants of the rural community, and the rural folk realize that the better it is built in the better service for every body.

In order to demonstrate that the Independent is sincere in these statements we offer with every paid up farmer's subscription, four weeks free advertising, not necessarily consecutive. See grain or potatoes may be advertised in the spring and produce in the fall. This privilege is not transferable. Take advantage of this offer and let your neighbors know your wants.

Immigration to Canada in the ten months of the fiscal year ending January 31st, amounted to 118,105, compared with 75,430 for the same period of 1925-6. This is an increase of 55 per cent. January immigration amounted to 4,764, compared with 2,324 for the preceding January, a gain of 79 per cent. Of this immigration 800 were British, 968 from the United States and 2,896 from other countries. During January 2,297 Canadians who had gone to the United States with the intention of remaining permanently returned to Canada, making a total of 5,003 so returned for the ten months of the fiscal year.

The Hon. William D. Fisher, Minister of Customs and Excise, announces that the present period of 30 days of free entry into Canada of United States motor tourists on a permit will be extended to 90 days, to conform with the privilege now granted by the United States authorities, who admit Canadian cars carrying motor tourists free into that country for 90 days. The only difference will be that the Canadian permit will not initially be for 30 days, but for a first and second 30-day extension, if and when the tourists show bona-fides and recommendation from reputable associations of automobilists in the United States. A larger tourist movement in Canada is expected to result from the change.

Talking to the Point

Our Classified Want Ads get right down to the point at which if you want something say so in a few well chosen words. The intelligent reader finds that kind of straight-from-the-shoulder talk and that is one reason why condensed Want Ads are so productive of the best kind of results. Whether buying or selling they will help you.

The Chautauqua will be in Mirror on the 10th, 11th, 13th and 14th of August.

## PIANO TUNING

Messrs Gavin Spence and Robert Moffatt are in town on their 19th annual visit. Leave orders at Flewwelling's.

TAKE NOTICE that the Village Council has enacted the following regulations regarding traffic within the Village limits:

- 1 A speed of more than 20 miles an hour is prohibited.
- 2 All cars parking in the street must nose into the curb and parking on the centre of the street parallel to the curb is prohibited.
- 3 Cars turning on the street must do so only at intersections.

Recently a bashful young man and a beautiful young girl were sitting beneath an umbrella at Sylvan lake. She smiled close to him with no result. The she sighed wistfully and looking up with soulful eyes murmured in a voice with emotion, "Kiss me." "I can't," he mumbled so articulate "some sand got into my mouth."

"Then swallow it, boy, swallow it," she snapped, "if ever any body needed sand you certainly are the guy". The couple couldn't have come from Mirror.

Canadian flintstone ore will soon be used in the manufacture of a new pigment called "Titanium White" (to be used in the same way as white lead) according to R. E. Monk, of Montreal, who states that plans are nearing completion for the erection of a plant in Montreal, and, if everything develops as expected, this plant will be set on in the autumn. The development in the autumn. The development branch of the Department of Colonization and Development, Canadian Pacific Railway, has been active in furthering the establishment of the industry.

The W.A. meet every third Thursday of the month.

The Ladie's Aid meet every second Thursday in the month.

The W.I. meet every first Saturday in the month.
